ABOUT ME

Full-stack architect/engineer with extensive experience in '.Net Framework' and enterprise application development whose passion lies in building great products while enabling others to perform their roles more effectively. Hardworking, self-starter with excellent analytical, problem-solving, and communication skills.

EDUCATION

2006 - 2011 **COMPUTER ENGINEERING**
Istanbul Commerce University, Turkey

WORK EXPERIENCE

2020 - Now **CHIEF SOFTWARE ARCHITECT**
DOA Software, Turkey

Besides my main tasks which are managing hiring process, overseeing development and leading the development team, I have created a generic API layer for integrations and participated in EDI and IATA integrations.

2018 - 2020 **IT APPLICATION ANALYSIS EXPERT**
UniCredit, Italy

First of all, completed a nearly impossible project which is HR Transformation of UniCredit Italy against all odds. Recruited and directed development team. Guided infrastructure team. Prepared internal development standards. Compiled emergency procedure for production environment. Besides managerial responsibilities take the roles of Microsoft SQL Server DBA and Security Expert.

2016 - 2017 **CHIEF SOFTWARE ARCHITECT**
BIS Cozum, Turkey

Managed framework team and assembled mobile application team under my management. Put in use cloud technologies (Amazon AWS, Microsoft Azure, and Office 365) and virtualization technologies (VMware ESX, Hyper V).

2012 - 2016 **SOFTWARE ARCHITECT**
BIS Cozum, Turkey

Developed frameworks (Colossus, Dionysus and Ares) which are unique in Turkey and only successful examples could be seen in high budget companies like Microsoft and IBM. These products still currently in use at large companies like Yapı Kredi, Akbank, İş Bankası, Borusan. Developed a custom ORM layer in harmony with the projects and the habits of the developers. Put in service technologies like TFS and Communication Server (Lync). Provided consultancy service to Yapı Kredi more than two years.
